.....fire safety is our business

2KG CO2 FIRE EXTINGUISHER

Guardian CO2 extinguishers are ideal for premises, such as in offices or where expensive machinery is situated. They offer clean fire fighting capability on burning liquids and electrical hazards. Guardian's 2kg CO2 model is manufactured and certified to the British and European Standard BS EN3: 1996; carries a BSI Kitemark; and is CE marked.

As with the rest of our extinguisher range, this model features rugged, quality construction. The cylinders are high quality aluminium, heavily powder-coat painted. The valves are brass with steel handles, and incorporate a safety valve. A quality horn is fitted, and the extinguisher comes with a steel wall-mounting bracket.

Product Specification:

- ▶ Model Number: GFC 200
- ▶ Fire Rating: 34B
