FIRE BLANKETS

HIGH PERFORMANCE FIRE BLANKETS MANUFACTURED AND CERTIFIED TO BRITISH AND EUROPEAN STANDARDS

The range of Guardian high performance, compact fire blankets are highly efficient in smothering fires in the earliest stages, by immediately starving the fire of oxygen. Fast and effective control of any fire is vital, so the Guardian range is manufactured to the highest specifications. The fire blankets in the Guardian range have been tested, approved and certified to the current British Standard BS EN 1869: 1997, and the European Standard EN 1869.

The range consists of top quality fire blankets packed in a variety of attractive containers to suit most applications. They can be used in domestic, industrial and leisure environments, and when combined with other products from Guardian Fire a total fire safety system is easily created.
